

# Disposition of Toxic Drugs and Chemicals in Man *Eleventh Edition*

## Disposition of Toxic Drugs and Chemicals in Man, *Eleventh Edition*

The purpose of this work is to present in a single convenient source the current essential information on the disposition of the chemicals and drugs most frequently encountered in episodes of human poisoning. The data included relate to the body fluid concentrations of substances in normal or therapeutic situations, concentrations in fluids and tissues in instances of toxicity and the known metabolic fate of these substances in man. Brief mention is made of specific analytical procedures that are applicable to the determination of each substance and its active metabolites in biological specimens. It is expected that such information will be of particular interest and use to toxicologists, pharmacologists, clinical chemists and clinicians who have need either to conduct an analytical search for these materials in specimens of human origin or to interpret analytical data resulting from such a search.

by **Randall C. Baselt, Ph.D.**  
Former Director, Chemical Toxicology Institute  
Foster City, California

HARD BOUND, 7" x 10", 2500 pp., 2017

### Reviewer Comments on the Tenth Edition

*"...equally useful for clinical scientists and poison information centers and others engaged in practice and research involving drugs."*

Y. Caplan, J. Anal. Tox.

*"...continues to be an invaluable and essential resource for the forensic toxicologist and pathologist."*

D. Fuller, SOFT ToxTalk

*"...has become an essential reference book in many laboratories that deal with clinical or forensic cases of poisoning."*

M. Hastedt, For. Sci. Med. Path.

*"...provides a concise source of information important for the understanding of the clinical and forensic significance of various substances in the human body."*

D.G. Barceloux, Clinical Toxicology

*"...continues on the fine tradition of resource that now includes over 1500 drugs and other poisons..."*

O.H. Drummer, For. Sci. Int.
